Patent US9442009

DeNovix are offering one lucky researcher the chance to win a one-off, pink DS-11 FX+ Instrument. As part of our ongoing support for the American Association of Cancer Research 2017 Meeting, we have created a unique, pink version of our DS-11 FX+ instrument to give away.

With multiple chances to enter and bonus entries for sharing with your lab mates, your lab could soon have access to the world's only integrated microvolume UV/Vis spectrophotometer and fluorometer, for free!

Visit [www.denovix.com/pink](http://www.denovix.com/pink) to enter the competition and share with your colleagues. The competition will close following the final day of the AACR 2017 meeting on 5th April.
